

Our business is founded on excellence, innovation and integrity. As a Project Consultant you will be working at the front line of delivering our world class consultancy services with these key objectives in mind. Already an incisive thinker and high achiever, you will be expected to deliver Programmes and Projects according to industry recognised methodologies, and to establish long-term collaborative relationships with our Clients that truly realise lasting and positive benefit to their business.

As a driving force behind the delivery of challenging, diverse and national scale projects, you will use your drive, initiative and professional judgement to support your team in exceeding Client expectations. Our projects are leading edge and so you must have a strong desire, and the professional discipline, to embrace, assess, shape and deliver in situations which may involve a significant degree of uncertainty and business risk.

The majority of our projects involve cutting edge technical integration work, and so you must be a tenacious problem solver with the ability and willingness to design and implement enterprise level solutions using the latest technologies, standards and concepts.

If you are looking for a career in a commercially and technically demanding environment, where you and your team can truly make your mark and earn an enviable reputation, then we want to hear from you.

➔ Skills and Experience:

Commercial:

- Ability to understand the 'bigger picture', and how your work fits into the delivery of a wider project or service.
- Awareness that a piece of work should only be undertaken if it has first been commercially agreed.
- Strong judgement skills, particularly in the escalation of significant technical issues which may have a wider business impact.

Leadership and Management:

- Ability to proactively identify, own, organise and deliver self-contained work packets with support from senior colleagues.
- Ability to proactively identify issues that may impact a project and concisely communicate these issues to senior colleagues.

Practitioner:

- Understanding of the end-to-end software development lifecycle.
- Experience of industry standard system development methodologies (e.g. RAD, UML, Object Orientation, Design Patterns etc).
- Experience of industry standard technologies and frameworks (e.g. .NET, J2EE, SQL, XML etc).
- Polished technical document preparation skills suitable for a wide variety of audiences.
- Demonstrable work planning skills.
- A Masters and/or a 2:1 or higher degree in an Information Technology, numerate or Geographic Information related discipline is preferred.

➔ Essential Attributes:

- Possess strong all round interpersonal skills, with an ability to analyse problems and exercise good judgement in finding effective solutions.
- Be creative and thorough, with excellent attention to detail and an understanding of the importance of quality.
- Be motivated by achievement and fulfilling their potential.
- Positive, flexible and adaptable with a 'can-do' attitude to overcoming challenges (that are not always technical).
- Enthusiastic and responsive when working within a team, determining a course of action and focusing efforts to deliver.
- Conscientious and diligent so that your team feels confident that you can be entrusted with ownership and accountability.

If you believe you are the outstanding Graduate Project Consultant that can take on this challenging and key role, then this is a genuine opportunity to develop your own career by helping us bring out the best in our very talented and career minded people.
